

Handle September update, visit us at Handle.com.

HAN:DLE

Dear Clients,

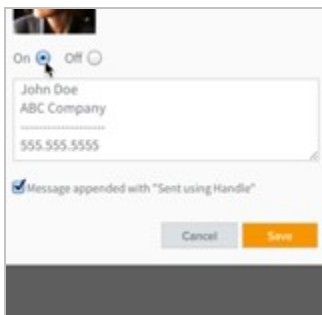

Team [Handle](#) has been hard at work on two major improvements: inbox loading performance (done) and our next-generation mobile experience (coming soon).

To help us get our next-gen mobile app across the finish line, we're looking for a few mobile mavens who love giving feedback and promise not to [leave their iPhone at the bar](#). If interested, please signup [here](#).

And thank you for all the thoughtful feedback on multiple accounts last month - we love hearing about features in action.

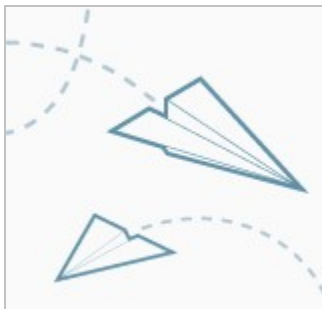

Best,

Shawn Carolan, CEO, [Handle](#)

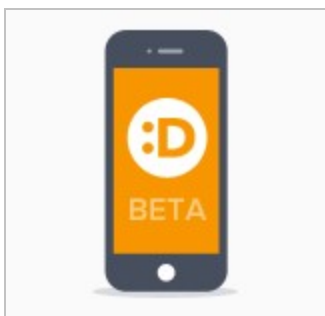

Email Signatures

Highly requested (thank you, Jon, Bob, Mike, and others!) and now delivered: a unique email signature for each of your accounts. Find it under the "Settings" gear icon.

Your Inbox, Faster

If you have the need for speed, smile. We've improved the way Handle fetches email from the Gmail server so that it's even more responsive, especially at login time.

iOS Beta Trial

To apply please click [here](#). We're very grateful to have clients who so are so eager to provide feedback and solve their email overload once and for all. Thank you Vytenis, Mike, Jason, Chris and 33 others for accelerating this on the roadmap.

What Our Clients Are Saying . . .

"Starting using Handle today and in one morning, I totally cleared my inbox for the first time in recorded history, and have a nice manageable to-do list to boot. Not sure what to do with all this gorgeous white space."

- Joe R.
